

CLINICOM WELCOMES NEUROSCIENTIST DR. ADAM GAZZALEY TO ITS ADVISORY BOARD

One of the world's leading cognitive neuroscientists brings deep expertise in brain assessment and technology validation to Clinicom

Dothan, Ala.. Clinicom announced that Dr. Adam Gazzaley has joined its Advisory Board, bringing decades of expertise in brain assessment, scientific validation, and the responsible development of health technology.

Adam Gazzaley, M.D., Ph.D. is the David Dolby Distinguished Professor of Neurology, Physiology and Psychiatry at UC San Francisco and the Founder and Executive Director of Neuroscape, a translational neuroscience center engaged in technology creation and scientific research of novel brain assessment and optimization approaches. Dr. Gazzaley is also co-founder of Akili, a company developing therapeutic video games, named to Fast Company's 2022 World's Most Innovative Companies. He has been a scientific advisor for dozens of companies including Apple, GE, Nielsen, Deloitte, Janssen, and PepsiCo.

Dr. Gazzaley has filed multiple patents, notably his invention of the first video game cleared by the FDA, authored over 190 scientific articles, and delivered over 750 invited presentations around the world. He wrote and hosted the nationally televised PBS special "The Distracted Mind with Dr. Adam Gazzaley," and co-authored the 2016 MIT Press book "The Distracted Mind: Ancient Brains in a High-Tech World," winner of the 2017 PROSE Award. Dr. Gazzaley is the recipient of the 2015 SfN Science Educator Award and the 2020 Global Gaming Citizen Honor, and was named in Newsweek's 2021 inaugural list of America's Greatest Disruptors. He is a Board of Trustees and Science Council member and Fellow of the California Academy of Sciences.

His addition to the Advisory Board reflects Clinicom's commitment to scientific rigor. As Clinicom advances structured, validated behavioral health assessment, Dr. Gazzaley's guidance will help ensure the platform continues to meet the highest standards of clinical and scientific credibility.

"Adam has spent his entire career proving that technology and rigorous science belong together, and doing it at the very highest level," said Michael Horning, Chief Executive Officer of Clinicom. "There are few people in the world who understand brain assessment the way he does, and the fact that he believes in what we are building means a great deal to us. His guidance will make us sharper, more rigorous, and more ambitious about what validated assessment can do for people."

"Clinicom is tackling something that matters deeply, understanding behavioral health clearly and early, with the rigor that clinical decisions demand," said Dr. Adam Gazzaley. "I am glad to support a team that takes both the science and the responsibility seriously, and I look forward to helping advance that work."

ABOUT CLINICOM

Clinicom is a clinically validated behavioral health assessment platform built on patented, proprietary clinical algorithms developed over more than 17 years of clinical research. Clinicom provides comprehensive biopsychosocial assessment, clinical decision support, structured reporting, and longitudinal monitoring for corrections, county government, schools, hospitals, and specialized care settings. Clinicom is encrypted, HIPAA compliant, and FDA 21 CFR Part 11 compliant. For more information, visit [clinicom.com](https://www.clinicom.com).
